## We're Entering the Digital-first World

Digital is now a permanent, yet dynamic fixture in our world.
Individuals in schools, companies, and governments are always asking whether there is some digital-based capability or enhancement that could improve lives and desired outcomes.

To thrive in a digital-first world, enterprises must have faster access to innovative technologies that scale, to new data services that have an immediate impact on outcomes, and to application deployment methods that ensure trust.

## Which of the following statements best describe where your organization is when it comes to adopting a digital-first strategy?

## Nordic IT spending

IDC Forecast: May 2022 vs. February 2022

## IT spending as percentage of total budget

$60.0 \%$

## Nordic services market - 2021

## Digitalization is driving long-term demand

Despite rising macro worries, customer demand for technology have never been higher, as businesses become increasingly dependent on the digital and prioritize technology investments.

The biggest frustration is how to meet this demand in the face of ongoing supply constraints, wide-reaching skills shortages, rising cost and growing geo-political threats.

Customers lack the skills to build and manage increasingly more complex hybrid IT environments, they face an ever-growing wave of cybersecurity threats, and they need trusted IT partners who can help them deliver business advantage from their technology investments.

At the same time, vendors cannot fulfill customers complex technology solution needs and they are turning to the partners more than ever before.
