Atea committed to lead the way in NIS2 Compliance

At **Atea**, we understand the critical importance of cybersecurity in today's digital landscape. Our unwavering commitment is to comply with the revised **Network and Information Systems Directive (NIS2)** and position ourselves as a leading force in guiding our customers through this essential directive.

The NIS2 directive aims to significantly elevate cybersecurity standards across the EU in sectors vital to society's well-being. As responsible stakeholders, we actively prepare to meet its demands:

- **Proactive Approach**: We thoroughly analyze the impact of NIS2 on our operations and those of our customers across all markets. A corporate project is initiated to analyze, assess, and close potential compliance gaps in our operations to ensure timely compliance with NIS2.
- **Independent Assurance**: Atea Managed Services, Atea Hardware Services and Atea Digital Services are ISO 27001 certified. These certifications provide assurance to our customers and authorities that Atea lives up to the best practices of international standards when it comes to security.
- **Investing in Security**: Atea continuously invests in people and technology to keep our operations secure. Our team of certified cybersecurity professionals is expanding and are continuously trained to stay ahead of NIS2 requirements.
- **Transparency and Collaboration**: We foster open communication, sharing insights and expertise with customers and partners to aid their NIS2 understanding and readiness.
- **Contribution to industry**: We are actively participating in industry discussions and policy development and by this contribute to shaping a robust regulatory framework safeguarding critical infrastructure while fostering innovation.

While NIS2 compliance presents some challenges it also is a significant opportunity to bolster cybersecurity across Europe. Together, we can forge a more resilient and secure digital society.
